

# Animal House

Powered by EBS

Proprietary formulation with 4 way Surfactant system + Penetrator.

## Product Description/Benefits

- Animal House is a safe non-ionic wetting agent, based on innovative block polymer technology designed to establish and maintain a consistent moisture level in the root zone.
- Animal House works by breaking down the hydrophobic coatings found in certain soil profiles reducing water repellency. Animal House balances the root zone moisture conditions which: Improves oxygen levels—Increases microbial activity—Improves plant stress tolerance—Increases plant metabolism.
- Animal House is safe to use on all types of turf throughout the growing season.

Available pkg sizes; 2x2.5 gl, 55gl, 250 gl tote

	Rate per acre	Rate per 1,000 sqft
	256-512 oz	2.0-6.0 oz
<b>Ingredients</b>		
<b>Curative Application</b>		Apply 6.0 fl oz in 1 to 2 gallon of water per 1,000 sq ft. Water in with sufficient irrigation to move product well into the root zone. Follow up application should be made on 4 week intervals (see Turf Maintenance Rates below).
<b>Maintenance Rates</b>		Apply 2.0 fl oz per 1,000 sq ft every 2 weeks or apply 4.0 fl oz per 1,000 sq ft every 4 weeks. Rates or intervals may have to be adjusted depending on soil and environmental conditions.
<b>Lawn Care, Sports Fields Sod Installation</b>		Apply 2.0 to 4.0 quarts per acre. Repeat every 4 to 8 weeks during the growing season. Rates and spray intervals will vary according to soil and environmental conditions.
<b>Spreader/Activator</b>		Apply 2.0 to 4.0 fl oz per 100 gallons of spray mixture. In difficult wetting situations such as hard water, the addition of a pH reducing agent is recommended.
