

### DISCOVER THE DURENTIS™ DIFFERENCE

Durentis™ insecticide is a highly concentrated formulation, offering low use rates and providing season-long control with one application. Durentis™ is fast acting - providing a zone of protection around the roots and its systemic properties allow for upward translocation. This allows the product to get into the grass plant quickly without the need for excessive irrigation.

### CONVENIENT AND COMPLETE

One early application of Durentis™ provides full season control against above and below ground chewing pests, including all 13 species of grubs and fall armyworms. In addition to its lawn protection, Durentis™ has an outstanding safety and environmental profile with minimum impact on many important beneficial insects, ensuring that the unique mode of action is focused exclusively on the target pests.

Target Pest	Application Timing	Durentis™ Rate (fl. oz./acre)	Durentis™ Rate (mL)
White Grub sp.	April	2.7	79
White Grub sp. + Turf Caterpillars	May-June	2.7	79
Fall Armyworm	Mid-Late Summer (or first sign of damage)	0.68	20

### PRODUCT ATTRIBUTES:

- Active Ingredient: chlorantraniliprole
- Chemical Family: Diamides (IRAC Group 28)
- Mode of Action (MoA): Ryanodine Receptor Modulators
- No signal word
- Use Rates: 0.68 – 5.4 fl. oz./acre

### LABELED PESTS:
