

Make "ALL" your products work BETTER

Product Description/Benefits

Sea Cure+ is a chitosan product with enhanced biostimulants as well as soil conditioners and a natural wetting agent

- Promotes root growth
- Increases root health
- Improves plant's natural immunity system
- Improves disease and insect resistance
- Consistent size of the molecule improves absorption
- Improves stress tolerance
- Increases efficiency of applied pesticides
- Production of reactive defense mechanisms
- Phytoalexin synthesis
- Cell wall reinforcement
- Increases production of pathogenesis-related proteins
- stimulates photosynthesis
- increases the production of microbial activity
- increase the efficiency of nutrients
- reduce soil compaction
- superior wetting
- reduce transpiration
- lower rates
- lower input costs
- improves cation exchange
- improves water efficiency
- stimulates microbial activity including: myccorhiza and trichoderma
- improves water efficiency
- increase biodiversity
- improve overall health
- improve symbiotic relationships
- improves root development
- increase drought tolerance
- improves soil structure
- improves seed germination times
- improves seed establishment times

Rate per acre	Rate per 1,000 sqft
---------------	---------------------

16-32 oz/Acre

0.36-0.72 oz

Guaranteed Anaylsis

Chitosan.....	4%
Natural Polymers.....	6%

Derived from: Chitosan, biostimulants and natural polymers

Available pkg sizes; 2x2.5 gl, 250 gl tote
